PROFESSIONAL SUMMARY

Full-Stack Engineer skilled in React, TypeScript, Node.js, Python, and FastAPI with PostgreSQL and MongoDB. Built production-ready platforms featuring role-based auth, MCP server integrations, and LLM-powered backends with AI-assisted development. Hands-on with agentic workflows and AI tools; leading 40+ members as President of the Creator Corner Club.

EDUCATION

Bachelor of Technology (Computer Science)	2024 - 2028
Newton School of Technology	Grade: 7.4/10.0
Intermediate (Class XII)	2023 - 2024
Sangam Sr. Sec. School Tosham (Bhiwani) Haryana	Grade: 73.0%
Matriculation (Class X)	2020 - 2021
Sangam Sr. Sec. School Tosham (Bhiwani) Haryana	Grade: 100.0%

PROJECTS

EditlanceX ([Github](#)) ([Demo](#)) March 2026

- Built a full-stack **freelance marketplace connecting video editors and clients** with role-based dashboards, live notifications, smooth hiring workflow, real-time application tracking, and analytics-driven hiring insights via Recharts.
- Frontend: React, TypeScript, Tailwind, Shadcn UI — Backend: Node.js, Express, JWT, Prisma ORM, Neon PostgreSQL.
- Hiring analytics via Recharts (hired/declined/pending stats); deployed on Vercel and Render.

TECHKART ([Github](#)) ([Demo](#)) February 2026

- Built a full-stack tech **eCommerce platform with an AI shopping agent**, featuring product search, filters, **90-day price history charts**, side-by-side comparison, persistent cart with stock validation, and COD/UPI/Card checkout flow.
- Frontend: React, Zustand, Tailwind — Backend: Node.js, Express, Prisma ORM, PostgreSQL, JWT auth, Google OAuth.
- Integrated a custom **MCP server for AI-powered shopping** via Claude; deployed on Vercel and Render.

Nehra Ji Technical ([Github](#)) ([Demo](#)) January 2026

- Built a **smartphone comparison and recommendation platform** with side-by-side specs, budget-based filters, admin dashboard, **live tech news**, structured buying guidance, and **YouTube-integrated tech content feed**.
- Frontend: React, TypeScript, Tailwind — Backend: FastAPI, PostgreSQL, SQLAlchemy, JWT, bcrypt admin access.
- Modular API routes with scalable DB schemas and **Google OAuth** for secure admin and content management.

CERTIFICATIONS

CHEM-AI-THON 2.0 National Hackathon - Finalist Punjab University & HMEL March 2026

- Secured a **Top 15 Finalist** position nationally. Engineered a multi-model AI operations framework (**Python, FastAPI**) bridging 1,200+ complex edge-sensor data tags into real-time predictive maintenance models.

Generative AI for Everyone DeepLearning.AI ([Link](#)) December 2024

- Gained hands-on knowledge of **LLM architecture**, **prompt engineering**, and **AI workflow** design to build and integrate AI-powered features into full-stack applications.

SKILLS

Computer Language: CSS, HTML, JavaScript, Python, TypeScript

Databases & Data Tools: Excel, MongoDB, MySQL

AI / ML: Machine Learning

Cloud & DevOps: Git and Github

Domain & Business Skills: Figma

Frameworks & Libraries: Express JS, NumPy, Pandas, Prisma ORM, React, React Native, Tailwind CSS

EXTRA-CURRICULAR ACTIVITIES

President – Creator Corner Club — Present

- Led a team of 40+ members to manage content planning, execution, and publishing activities.
- Increased student engagement through campaigns while handling coordination, deadlines, and leadership.
