PROFESSIONAL SUMMARY

Full-Stack Engineer architecting AI-driven tooling and scalable distributed systems. I build robust backend infrastructure and complex data pipelines using Node.js, Python, TypeScript, and React, supported by deep database architecture (MongoDB, Neon PostgreSQL). I lead technical execution—recently as President of the Creator Corner Club—with a singular focus on resolving architectural bottlenecks and shipping highly optimized, production-ready code daily.

EDUCATION

Bachelor of Technology (Computer Science) 2024 - 2028
Newton School of Technology

Intermediate (Class XII) 2023 - 2024
Sangam Sr. Sec. School Tosham (Bhiwani) Haryana

Matriculation (Class X) 2020 - 2021
Sangam Sr. Sec. School Tosham (Bhiwani) Haryana

PROJECTS

EditlanceX ([Github](#)) ([Demo](#)) March 2026

- **Architected** a **full-stack freelance marketplace** for clients to hire video editors for **part-time/full-time roles**.
- **Engineered** **secure role-based access** with **React**, **Node.js**, **Google OAuth** and separate client/editor dashboards.
- **Optimized frontend performance** to streamline **job posts**, **hiring workflows**, and **application tracking**.

TECHKART ([Github](#)) ([Demo](#)) February 2026

- Architected a smart eCommerce platform for tech products with device comparisons and price history tracking.
- Engineered a responsive UI using **React.js** and **Tailwind CSS** for seamless product discovery and analysis.
- Built secure **Node.js** and **Neon PostgreSQL** backends with **Google OAuth** to power recommendation engines.

Nehra Ji Technical ([Github](#)) ([Demo](#)) January 2026

- Engineered a tech review platform featuring device specs, industry news, and processor/mobile comparisons.
- **Bridged** a **React/TypeScript frontend** with a **FastAPI/Python backend** for fast delivery and seamless UX.
- **Designed** scalable **PostgreSQL** pipelines and implemented **Google OAuth** for secure admin and content management.

CERTIFICATIONS

CHEM-AI-THON 2.0 National Hackathon - Finalist Punjab University & HMEL March 2026

- Secured a **Top 15 Finalist** position nationally. Engineered a multi-model AI operations framework (**Python**, **FastAPI**) bridging 1,200+ complex edge-sensor data tags into real-time predictive maintenance models.

Generative AI for Everyone DeepLearning.AI ([Link](#)) December 2024

- Mastered **LLM** architecture and advanced prompt engineering to architect agentic workflows, powering scalable AI-integrated developer tools and backends.

SKILLS

Computer Languages: Machine Learning, Python, TypeScript, HTML, CSS, JavaScript

Data Tools: NumPy

Software Packages: Pandas, Figma, React Native, Prisma ORM, Tailwind CSS, React, Excel, Express JS, MySQL, MongoDB

Others: Git and Github

EXTRA-CURRICULAR ACTIVITIES

President – Creator Corner Club — Present

- Led a team of 40+ members to manage content planning, execution, and publishing activities.
- Increased student engagement through campaigns while handling coordination, deadlines, and leadership.
